(Commemoration of St. Gregory the Great, Pope/Doctor)

One of the greatest Popes the Church has ever known, England owes its conversion to him. At a period when the invasion of the barbarians created a new situation in Europe, he played a considerable part in the transitional stage, during which a great number of them converted. He watched over the holiness of the clergy and preservation of discipline, together with the temporal interests of Rome and the spiritual interests of all of Christendom. To him the liturgy owes several of its finest prayers, and the name "Gregorian chant" recalls his work in the development of the Church's sacred chants. His commentaries on Sacred Scripture exercised considerable influence on Christian thought, especially in the Middle Ages. He is one of the four great doctors of the Latin Church. He died March 12, 604.
