In the eleventh century, the Church, under the influence of lay princes, was ravaged by serious disorders in the life of the clergy and by simony. Hildebrand, a Roman monk of outstanding character, who had been at Cluny, became, under six successive popes, the instrument and principal agent of reform. Becoming Pope himself, under the name Gregory VII, he openly fought against the abuse of lay investiture (that is, civil rulers choose the bishops), the source of the evils from which the Church was suffering. He gained himself enemies and died in exile in Salerno in 1085, and intrepid defender of the liberty of the Church.
